

Recall last Friday's lesson...

Lesson #2

Cybersecurity issues related to Passwords, Malware, and Privacy

Agenda for today:

1. Discuss about a social media post/profile
2. Self-directed lessons on cyber threats
3. Kahoot Quiz

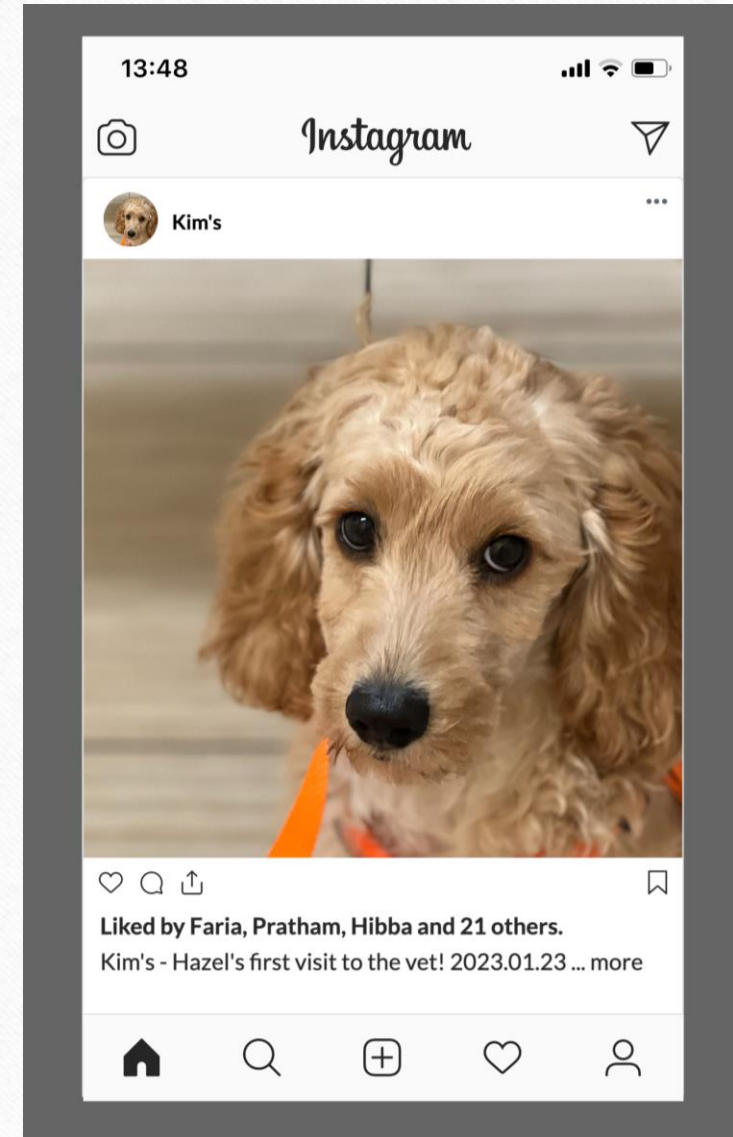

Learning Goals:

- Explore and learn key cybersecurity threats related to passwords, malware, and privacy.
- Learn tools for protecting yourself from such threats.

Success Criteria:

- Identify and describe common cybersecurity threats with examples.
- Show proficiency in utilizing tools and techniques to protect personal information from cyber threats.

Minds-On:
What information can we
get from this single
Instagram post?

Reflect on your social media post

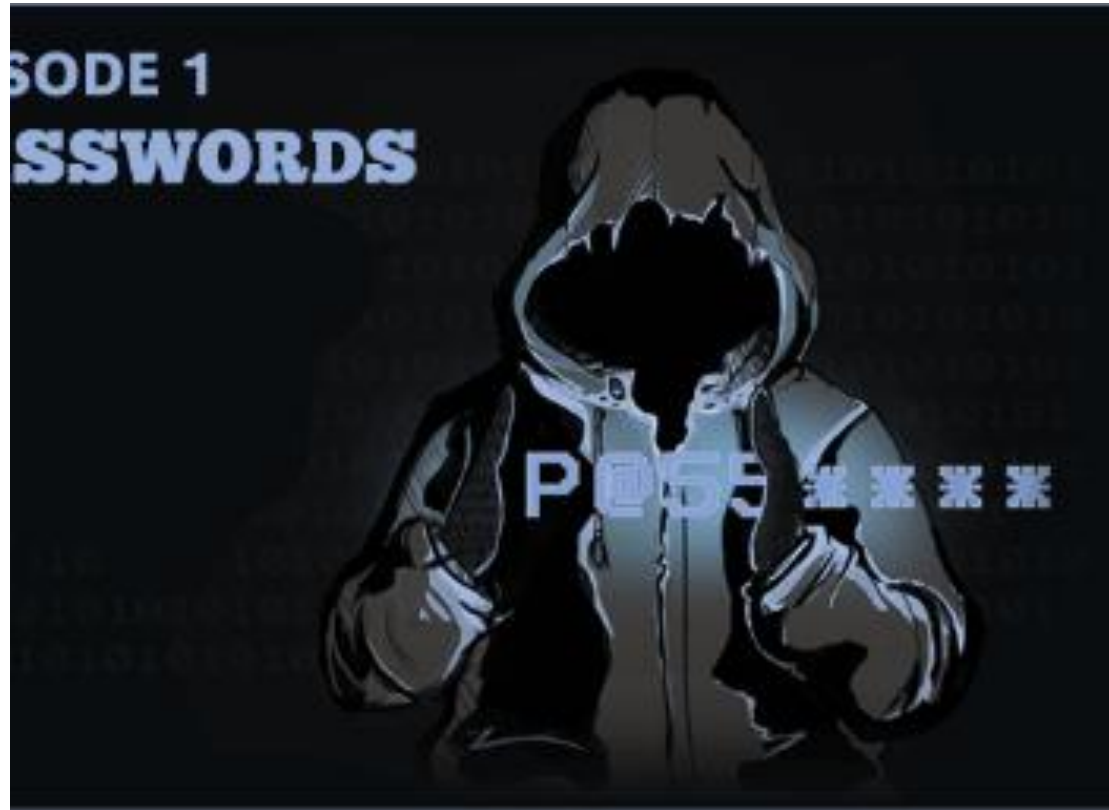

- What are your privacy settings for your social media account?
- What information is being exposed to the public?

SECURE COMICS
